

aws\_key\_pair.ec2-tf-test-key

aws\_security\_group.allow\_tls

aws\_instance.web

```
graph LR; web[aws_instance.web] --> key_pair[aws_key_pair.ec2-tf-test-key]; web --> sg[aws_security_group.allow_tls];
```

The diagram illustrates the dependencies of the `aws_instance.web` resource. It is shown as a box on the right with two arrows pointing left to two other boxes: `aws_key_pair.ec2-tf-test-key` (top) and `aws_security_group.allow_tls` (bottom). This indicates that the web instance depends on both the key pair and the security group.
